

## PEF Employee Health Insurance Rates 1/1/12 to 3/31/12

Because the increase in the cost of your health insurance premiums from October and November 2011 was deferred, this cost will be included in your 2012 premium contributions for the first six bi-weekly paychecks beginning with the check dated January 4, 2012. The amount of the adjustment is based on the option you are enrolled in for 2012.

Once these six bi-weekly adjustments are taken, your health insurance premium deduction amount will reflect the 2012 rate without any deferred premium contribution (see attached).
